

Hampton University Proton Therapy Institute Update The Joint Commission on Health Health Living/Health Services Subcommittee

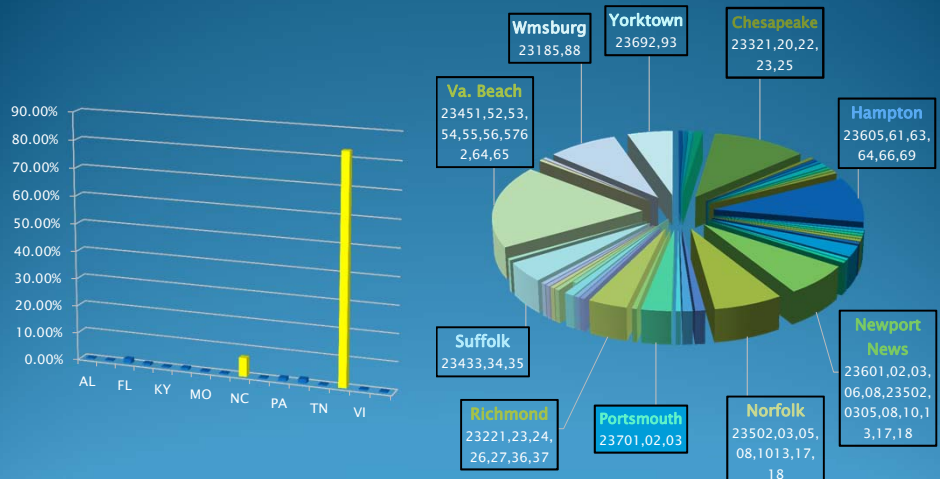

INTRODUCTION – Bill Thomas, Associate Vice President

PRESENTERS:

- **PATIENT DEMOGRAPHICS, EDUCATION AND TRAINING INITIATIVES** – Keith Gregory, MBA
- **CLINICAL RESEARCH** – Tyvin Rich, MD
- **INTERNATIONAL OUTREACH** – Allan Thornton, MD

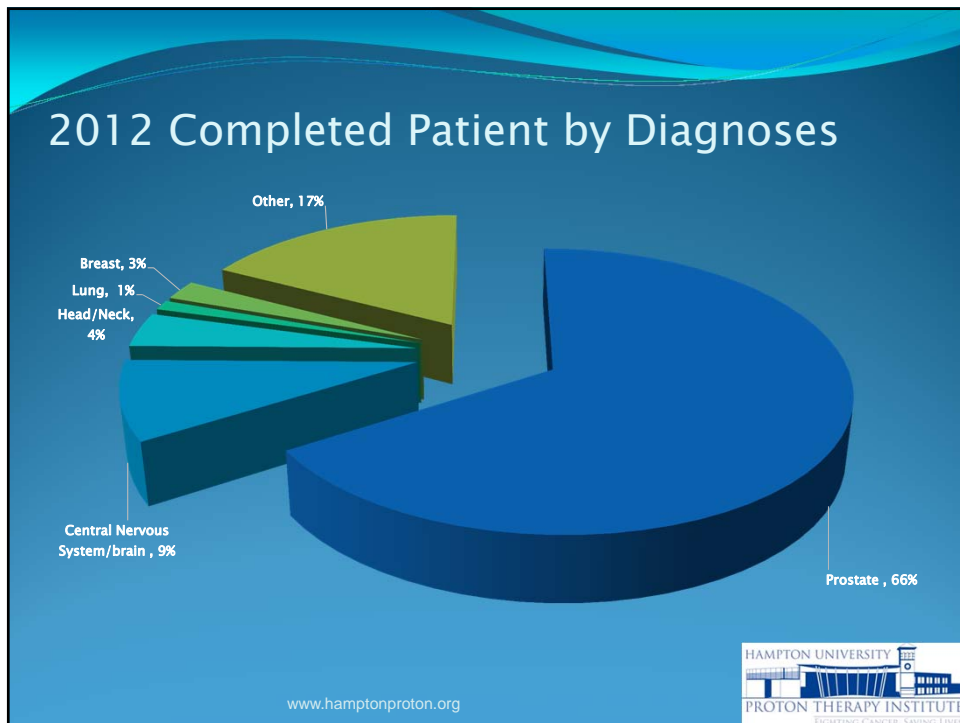

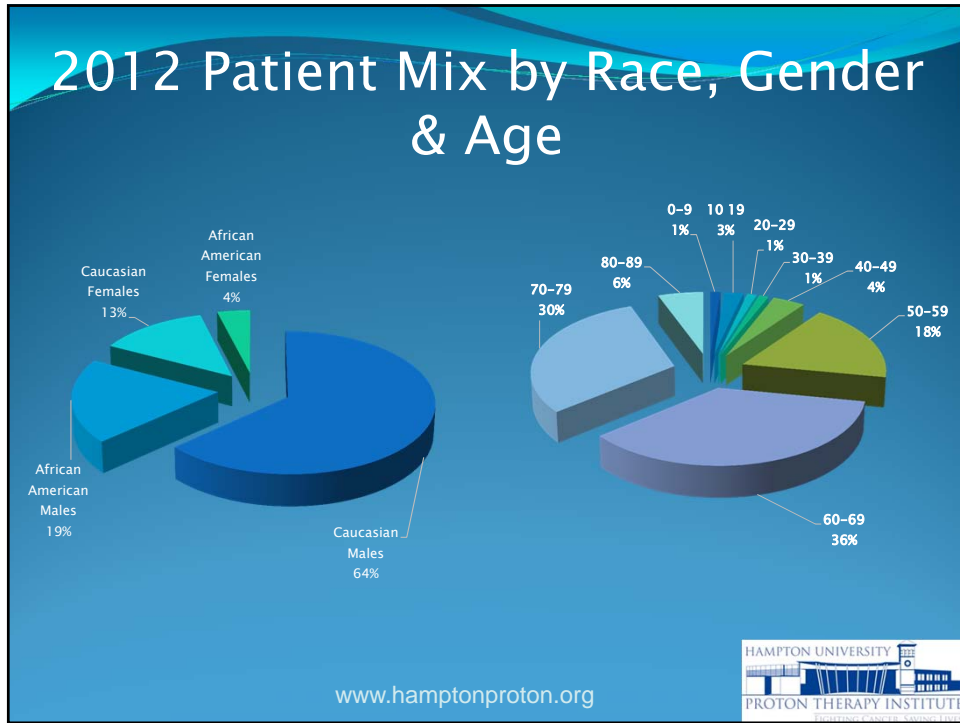

QUESTIONS AND ANSWERS

2012 Completed Patient Zip Code Data

Basic Research: PET activation by Protons

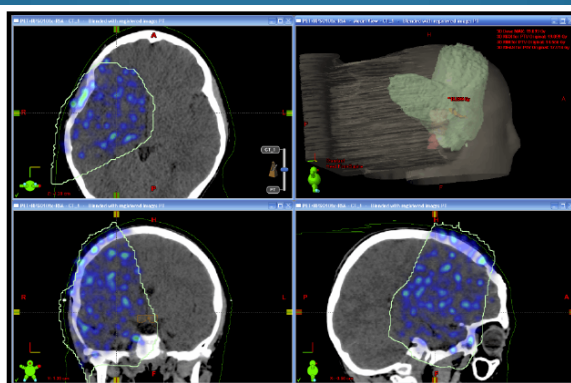

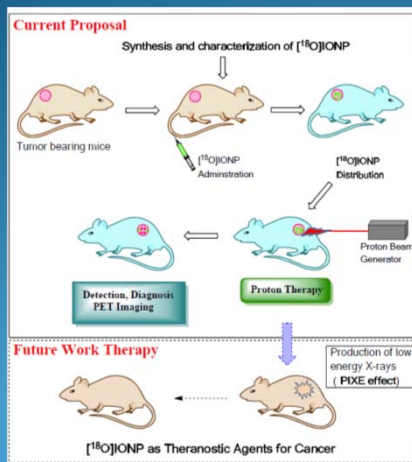

Figure 8. Beam-induced ^{11}C positron activation superposed with initial planned isodoses map. In-vivo PET activation exhibits a good agreement with initial proton fields.

A collaborative project with
Dr. Dongfang Pan at the
University of Virginia

Seed money provided by funds
from the NHRC

Others in Process:

- Patient Immobilization
- Beam Gating

Detector Development

International and Pediatric Patient Update

- 5 anesthesia patients have received treatment at HUPTI since the 2012 collaboration with CHKD began
- 18 pediatric patients treated to date
- International Patients
 - 5 – Bahrain
 - 1 – Oman
 - 1 – Nigeria
 - 2 – Saudi Arabia
 - 1 – Argentina

www.hamptonproton.org

Collaboration

Positive Economic Impact, Education, Training, and Treatment Partnership

Positive Economic Impact

- Currently treating 8 patients from the MENA region
- Each patient spends on Average of \$95k to \$100k, which includes Treatment, Housing, Car Rental, and Food.
- Estimated to treat 50 Patients in 2013 and 100 in 2013, which will directly result in \$5m to \$10m of international expenditure
- **Serve as Training Facility:** Hampton Proton will train radiation oncologists from the the Middle East on how to treat with Protons.
- **Serve as Treatment Facility:** : Hampton Proton is currently treating patients referred to SAH Care from the Middle East.
- **Knowledge Transfer:** Hampton Proton and SAH Global have entered into a agreement to transfer operational knowledge of what it takes to run and operate a Proton Therapy Cancer

Global Recognition

International Symposia

Educational Seminars For The Hospitals and Ministry of Health

PROTON THERAPY SYMPOSIUM

Clinical Effectiveness of Proton Therapy in Cancer Treatment

February 3rd, 2013 1:00 to 3:30 PM

Dubai Department of Medical Education
Rashid Medical Library • Main Auditorium

WHO SHOULD ATTEND

Oncologists	Referring physicians	Nurses
Hematologists	Pediatric care providers	Social workers
Medical directors	Case managers	

Other healthcare professionals who are interested in knowing more about the diagnoses, treatment, and care of proton therapy patients.

SYMPOSIUM GOALS

- Interpret the clinical effectiveness of proton therapy via a-via alternative external beam radiotherapeutic approaches. Proton applications will be discussed for a variety of solid and lymphoid tumors diagnoses, including those relevant to the pediatric population.
- Incorporate an appropriate sequence for chemotherapy/surgical/radiological intervention for solid tumors into patients' proton therapy plans for improved patient outcome.
- Utilize information gained during the conference to appropriately refer patients to the Proton Therapy Center
- Assess and treat solid tumors and other malignant diagnoses using novel targeted therapies and proton beam therapy for better patient outcomes and reduction of normal tissue damage.

DR. ALLAN THORNTON
CHIEF MEDICAL OFFICER

Dr. Thornton is considered to be one of the world's best cancer physicians with over 20 years of experience in Proton Therapy and is sought after for dealing with highly complex clinical cases. He is also world renowned for leading the ongoing research and development in the field of Proton Therapy.

DR. ANDREW L. CHANG
CONSULTING DIRECTOR OF PEDIATRIC RADIATION ONCOLOGY

Dr. Andrew L. Chang, who trained at the first clinical proton radiation therapy center in the world at Loma Linda University Medical Center, is one of five pediatric proton therapy radiation oncologists across the United States.

PROTON THERAPY SYMPOSIUM

Clinical Effectiveness of Proton Therapy in Cancer Treatment

April 16th, 2013, 10:00 AM to 2:30 PM

Royal Hospital Oman
Main Auditorium

WHO SHOULD ATTEND

Oncologists	Referring physicians	Nurses
Hematologists	Pediatric care providers	Social workers
Medical directors	Case managers	

Other healthcare professionals who are interested in knowing more about the diagnoses, treatment, and care of proton therapy patients.
