Bruce D. Perry, M.D., Ph.D.

This chapter is designed as supplemental material for The ChildTrauma Academy's video/DVD series *Understanding Traumatized and Maltreated Children: The Core Concepts*. These materials have been developed by the ChildTrauma Academy to assist parents, caregivers, teachers and various professionals working with maltreated and traumatized children. Continuing Education credits can be given for reviewing these materials. Please refer to the Introductory materials for more information about additional supplemental materials and CEU credits.

SOLUTIONS ACROSS THE CONTINUUM

7

Add CDC's ACE optional module to Virginia's Health Indicator Data Behavioral Risk Factor Surveillance System (BRFSS)

8

Early Screening and Intervention in Schools and Primary Care

- Reaching youth and families on the early end of the continuum provides better quality of life and lowers healthcare costs

Schools – Cognitive Behavioral Intervention for Trauma in Schools (screening and 10 week group, parent involvement, teacher involvement)

Primary Care - Pediatric Symptom Checklist completed by parents to assess child functioning

TennCare Focus

FOCUS AREA: Assuring that youth who could be treated in the community for behavioral health needs had access to high quality behavioral health services in the community

- Improve behavioral health of youth served
- Reduce reimbursement rates across the state

11

TennCare Project

- Determine youth who could be served in
 - Home Based Treatment (HBT)
 - Mental Health Care CoordinationInstead of RTC placement
- Work with MCOs to define terms, policies, and reimbursement rates
- Put out RFP to behavioral health providers to participate
