JULIE DIME & BRENT RAWLINGS
VIRGINIA HOSPITAL & HEALTHCARE ASSOCIATION

VHHA - About Us

Vision

Through the power of collaboration, the Association will be a recognized driving force behind making Virginia the healthiest state in the nation.

Mission

Working with our members and other stakeholders, the Association will transform Virginia's health care system to achieve top-tier performance in safety, quality, value, service and population health. The Association's leadership is focused on: improving access to care; continuing to improve health care safety, quality, and service; promoting a vibrant, high-value health care system; and, advancing population health to promote health and economic opportunity for all Virginians.

Key Stats

110 community, psychiatric, rehabilitation and specialty hospitals

18,881 hospital beds

17 designated trauma centers

49% are rural hospitals

51% are urban hospitals

77% of Virginia hospitals are not-for-profit

Hospitals are Major Economic Engines...

**TOP EMPLOYER IN
LOCALITIES ACROSS
THE STATE**

**DIRECTLY PROVIDE
130,000+ JOBS**

**\$40 BILLION ECONOMIC
CONTRIBUTION TO
THE COMMONWEALTH**

...That Provide Substantial Community Benefits

Virginia hospitals have been partners in increasing health care access in Virginia by supporting a bipartisan, fiscally-responsible Medicaid expansion plan approved in 2018 that has enabled more than 464,711 Virginians to gain health care coverage.

Community benefit investments include free care and financial assistance to people in need, Medicaid program losses, subsidized health services such as trauma care, behavioral health, and community programs that improve the health of people in communities across Virginia.

Community benefit, as defined by the IRS, totaled \$1.7 billion in 2018. With other forms of community support, including Medicare losses, taxes paid, and bad debt expenses absorbed by Virginia hospitals, the **total benefit to Virginia communities in 2018 is \$3.34 billion.**

In 2019, Virginia hospitals directly provided more than 132,000 good-paying jobs. Hospitals support payroll and benefits exceeding \$8.5 billion, and contribute roughly \$40 billion in economic activity, according to 2016 data.

Virginia Hospital Community Benefit (FY2008-FY2018)

Pressing Priorities and Initiatives

COVID-19: Response and Recovery

Managing Patient Care and Costs

COPN: Reform Implementation

Health Equity and Population Health

Access to Care: Medicaid Expansion and Insurance Marketplace

Insurance and Billing Practices

COVID-19: Response and Recovery

Hospitals' Role in Virginia's COVID-19 Response

Care	Prepare	Respond	Invest
Serving as the frontline healthcare providers for COVID-19 medical care (average of 1,300 COVID-19 hospitalized patients per day March thru June)	Rapidly expanding bed capacity and staffing to prepare for patient surge (added 3,695 beds under EO52 avoiding costly state investment in ACFs)	Operating Regional Healthcare Emergency Preparedness Coalitions, plus 20 working committees in partnership with VDH	Investing in unprecedented amounts of PPE, ventilators, and supplies and rapidly expanding testing capabilities (currently in excess of 2,000 tests per day)

COVID-19 in Virginia Hospitals

2020 COPN Reform Bill - SB 764 Barker

Provide access to care for uninsured and underinsured Virginians

Protect availability of essential health services in all regions of the Commonwealth

Provide quality of care oversight and accountability

Train the future health care workforce

Prepare resources for public health emergencies and natural disasters

COPN makes it possible.

COPN: Reform Implementation

2020 COPN Reform Bill - SB 764 Barker

The current system has well-documented issues that have been studied extensively.
The 2020 General Assembly passed SB 764 to enact much-needed reforms.

EFFECTIVE JULY 1, 2020

Consensus product of two different multi-stakeholder work groups spanning two administrations

Updates the State Health Services Plan (formerly SMFP) and sets up ongoing task force

Removes outmoded and non-contested projects (lithotripsy, MSI, obstetrics, nuclear medicine, stereotactic radiosurgery/therapy)

Modernizes the COPN review process

COPN: Reform Implementation

2020 COPN Reform Bill - SB 764 Barker

Key Dates for Implementation

Develop a plan to reduce the average application review cycle period to not more than 120 days

Report due
December 1, 2020

Create an online inventory of capacity authorized by current certificates

By January 1,
2021

Establish a public education and outreach program designed to improve public awareness of COPN

By January 1,
2021

Form the State Health Services Plan task force to update the SHSP

By November 1,
2022

Implement a timely and reliable data analytics system

By January 1,
2023

Access to Care: Medicaid Expansion

Continued Success, but Growing Expense for Hospitals

Benefits

Nearly 480,000 Virginians now have coverage through Medicaid expansion and DMAS estimates that enrollment will grow to more than 550,000 members over the biennium.

According to the DMAS dashboard, 474,000 current Medicaid expansion members have received at least one service, including critical treatment for cancer, diabetes, and addiction recovery.

The Investment

Private acute care hospitals cover the state share of Medicaid expansion. In FY2021 hospitals will pay \$370 million, a 30% increase over FY2020 assessment totals due to higher enrollment.

Medicaid supplemental payments are highly dependent on utilization of hospitals' services which has been greatly impacted by COVID.

Access to Care: Insurance Marketplace

State-Based Exchange and Reinsurance Promote Coverage

VHHA participated in the 2019 and 2020 Marketplace Stability and Reinsurance Working Group

Goal 1:

Increase the availability of quality, affordable, and comprehensive health care coverage for Virginians

Goal 2:

Establish a plan for and funding source for a reinsurance program to reduce the cost of health plans

Goal 3:

Ensure policy recommendations strengthen and protect the ACA market

2019 - Passage of Medicaid Expansion - 474,000 + covered Virginians

2020 - Passage of a State-Based Exchange - Ensure Network Adequacy

Recommendation for 2021 Session: Establish Reinsurance Pool and Funding Mechanism. The investment in funding determines the amount of savings.

Managing Patient Care and Costs

Medicaid Payment Policies and Care Coordination Work Group

DMAS to convene a work group to “*evaluate and develop strategies and recommendations to improve payment policies and coordination of care in the Medicaid program to encourage the effective and efficient provision of care by providers and healthcare system serving Medicaid members.*” Item 313YYY (2020)

- Focus is emergency department (ED) utilization and readmissions.
- VHHA actively participating.

Oct. 27th meeting – VHHA presented data on ED utilization trends across payors and demographics

Nov. 19th meeting – VHHA to present information care coordination processes/activities for emergency department care and hospital discharges/readmissions

DMAS Work Plan

Emergency Department (Phase I)

- ✓ Convene Workgroup **July-October 2020**
- ✓ Address emergency department utilization, care coordination, non-emergency alternatives and develop recommendations.
- ✓ Deliver report to General Assembly by December 15, 2020.

Hospital Readmissions (Phase II)

- ✓ Convene Workgroup **March 2021**, after the 2021 General Assembly session.
- ✓ Address hospital readmissions, care coordination, factors that impact readmissions and develop recommendations.
- ✓ Deliver report to General Assembly in fall 2021.

Free-Standing Emergency Departments and Hospitals (Phase III)

- ✓ Workgroup convening, TBD in 2021.
- ✓ Address marketing of free-standing and hospital EDs on utilization and lower-cost alternatives.
- ✓ Deliver report to General Assembly TBD.

DMAS

Initial report due to Joint Subcommittee for HHR Oversight by Dec. 15, 2020.

Managing Patient Care and Costs

HOW A MEDICAID ER VISIT IS PAID UNDER 313.AAAAAA

THE IMPACT ON THE PHYSICIANS TAKING CARE OF MEDICAID PATIENTS

If the emergency is on the "preventable" DMAS list of 790 codes

Required by law

Managing Patient Care and Costs

Promote Proven Strategies to Reduce Reliance on EDs

“Experience and research suggests that narrow strategies to reduce ED usage by attempting to distinguish need on a case-by-case basis have had limited success in reducing expenditures to date, due in part to the very reasons for higher rates of utilization by Medicaid beneficiaries including unmet multiple health needs and the limited availability of alternative health care services.” CMS Informational Bulletin (2014)

Strategy 1: Broaden Access to Primary Care Services

Ensure network adequacy

Two-thirds of emergency visits occur after business hours (weekdays 9am-5pm)

Strategy 2: Focus on Frequent ED Users - “Super-utilizers”

5% of the Medicaid “super-utilizers” = 40% of resources

Enhance and integrate the Emergency Department Care Coordination (EDCC) program

Strategy 3: Target needs of people with behavioral health challenges

Invest in outpatient community resources - fully fund STEP-VA

Execute Behavioral Health Enhancement (DBHDS and DMAS led)

Leverage existing programs seeking to address social determinants of health including:

Unite Us Program - public health infrastructure that connects health and social care

Partnering for a Healthy Virginia - VDH and VHHA partnership

Drivers of ER Utilization

Health Equity and Population Health

Maternal Health

- **18-month Maternal Health Collaborative** in partnership with VDH.
 - Guide hospitals in identifying contributing factors in the variation in maternal morbidity among their patient populations
 - Identify root causes of poor maternal outcomes
 - Translate knowledge into replicable action plan to include patient and community-centered approaches to drive cost-effective, innovative improvements in maternal care.
- **Monthly VNPC Webinar Series** hosted by VHHA Center for Healthcare Excellence

Maternal Outcomes Dashboard to assess factors that drive outcomes:

Current data on:

- Incidence of severe maternal morbidity (SMM), and mortality, chronic disease, length of stay, and birth outcomes by race, zip code, payer type, parity and applicable social determinants of health ICD codes (z-codes).
 - Neonatal Abstinence Syndrome (NAS) incidence by zip code, payer type, income, race and any SDOH indicators
- **VHHA** technical support and guidance on the VNPC Steering Committee, Maternal Mortality Review Team, and State Agency Maternal Health Workgroup.

This material is produced as a result of the Maternal Health Collaborative awarded to VHHA Foundation supported by the Virginia Department of Health, Office of Family Health Services. These data and information are solely the responsibility of the authors and do not necessarily represent the official views of VDH. No item designed for or by VHHA Foundation or its affiliates shall be duplicated or furnished to others without explicit prior written permission granted by VHHA Foundation.

Health Equity and Population Health

Hospital-Based Violence Intervention Programs (HVIPs)

A health-centered model to reduce community and intimate partner violence

- Trained staff provide support and wraparound services to victims of violence in hopes of preventing reinjury and promoting individual health
- May 2019 – VHHA Foundation awarded Victim of Crime Act (VOCA) funds allocated to DCJS to support HVIP efforts in communities with significant need
- Local experts at VCU Health organize and facilitate training around HVIP and victim advocacy
- Five hospitals participating:
 - Bon Secours Mercy Health - Richmond
 - Sentara Norfolk General Hospital
 - Riverside Regional Hospital
 - VCU Health
 - Chesapeake Regional Medical Center

Accomplishments

- 867 victims of violence served in first year (goal was 200)
- Increased hospital and community awareness and training around HVIPs
- Recruitment, hiring, and onboarding of program coordinators and many frontline intervention specialists
- Trainings were adapted to meet the challenges of the COVID-19 pandemic
- #ViolenceIsAHealthcareIssue and Gun Violence Awareness Month Campaign
- Year 2 underway!

This project was supported by Award No.20-A4739VP18 awarded by the Department of Criminal Justice Services' Victim Services Grant Program, Department of Justice. The opinions, findings, and conclusions or recommendations expressed in this publication/program/exhibition are those of the author(s) and do not necessarily reflect the views of the Department of Justice or grant-making component.

Health Equity and Population Health

Partnering for a Healthy Virginia

VHHA partnership with VDH, local health departments, local jurisdictions, the medical community, and other stakeholders to address population health

While access to medical care certainly affects personal health, it is now widely understood that the environment in which a person lives, works and plays accounts for 80% of health outcomes.

Partnering for a Health Virginia (PHV) conducted assessment of screening tools for social determinants of health and e-referral systems was conducted and found the following:

1. Screening for social determinants of health is happening in pockets and with no standardization.
2. No statewide e-referral system that helps connect Virginians, particularly vulnerable populations, with needed resources. This creates multiple barriers to achieving health equity including lack of transportation, food insecurity and lack of employment.

When COVID-19 hit the Commonwealth, this lack of public health infrastructure became painfully obvious and the need for that infrastructure became more apparent.

As more and more families were asked to quarantine themselves, few had access to healthcare professionals, food or jobs. This made quarantining difficult for those at greatest risk.

Now, Virginia is experiencing the highest rates of unemployment in decades, so the need for residents to be connected to support services continues to grow.

Health Equity and Population Health

Unite Us

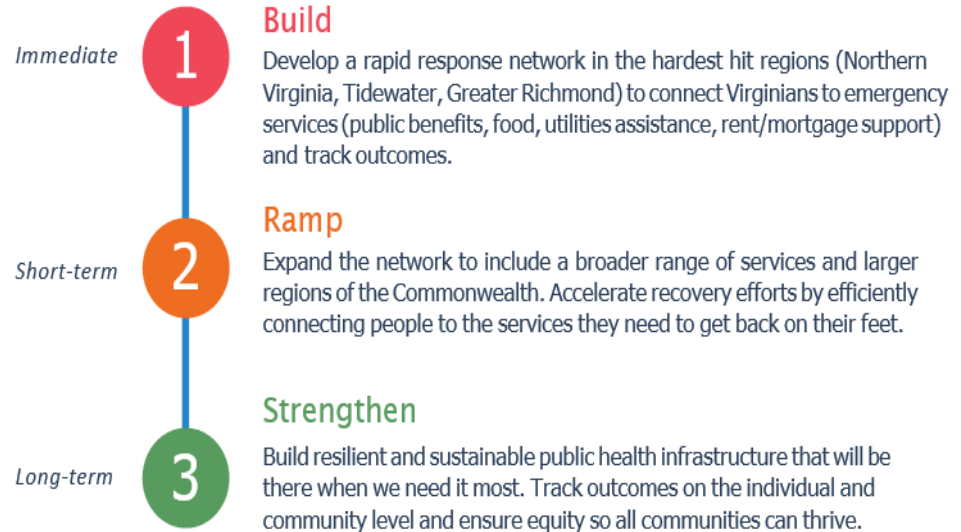

Outcome-focused technology to support coordinated care networks of health and social service providers to address social determinants of health

Unite Us creates public health infrastructure that connects health and social care and assists states in their effort to address the social determinants of health.

Public health experts work deeply with each community to build coordinated care networks of health and community services.

Through these networks, the state can connect Virginians to critical services, track the outcomes delivered, evaluate the gaps in services, and direct resources where they're needed most.

The Governor has committed \$10M in CARES Relief Act (CRF) funds to initiate the implementation of an IT platform designed to link vulnerable members of society to needed social services to aid the Commonwealth in its response to and recovery from the COVID-19 pandemic. The \$10M investment covers the initial strategic implementation plan for the network and training. No additional state support will be necessary.

Insurance and Billing Practices

GA Passes Landmark Legislation to End Surprise Billing

The 2020 General Assembly passed SB 172/HB 1251 to prohibit balance billing for emergency services and out-of-network services at an in-network facility

DELAYED IMPLEMENTATION JANUARY 1, 2021

After three years of stalled efforts, hospitals, physicians, and insurers were able to reach consensus on a workable approach

Payment based upon commercially reasonable amount; caps patient responsibility at the in-network cost-sharing amount

Establishes an arbitration process in the event an insurer and provider are unable to agree on a “commercially reasonable amount”

Standard template for a notice of consumer rights and other transparency requirements for providers and insurers

Insurance and Billing Practices

Updates to Fair Business Practices Act

HB 1384 (Robinson) seeking to make various updates to the Fair Business Practices Act carried over to 2021

Prohibit unilateral amendments to material provisions of provider contracts; streamline process for coverage and payment policy updates

Require provision of a complete fee schedule in machine-readable format at the time of contracting

Update timeframe for claims submission and payment

Clarify the role of the State Corporation Commission in enforcing the law and include greater transparency on compliance

2021 Legislative and Budget Priorities

- Strengthen Liability Protection for Health Care Providers and Employers
- Updates to the Fair Business Practices Act
- Maternal Health Data Collection
- Behavioral Health Initiatives
- Removal of the Emergency Department Utilization and Readmissions Penalty
- Reduction of the Provider Assessment Administrative Fee
- Measures to protect the coverage assessment from uncontrolled growth in the Medicaid program and original intent/purpose
- Trauma Fund Sustainability
- Reallot funding for Nurse Preceptor Program
