

Agenda

- 1. Who is Virginia Health Information (VHI) and what do we do?
- 2. How we have evolved since 1993
- 3. Our impact in Virginia over the past year
- 4. Strategic Planning for next year and beyond

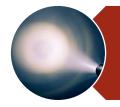

Official Missionhttps://vhi.org/About/default.asp

Translation:

Break down walls and open channels to share healthcare data

Support reporting where transparency is needed the most

Do this in a way that is unbiased, collaborative and provides substantial value to the Commonwealth per dollar of investment

Board of Directors

Our governance structure is built to serve all healthcare stakeholders

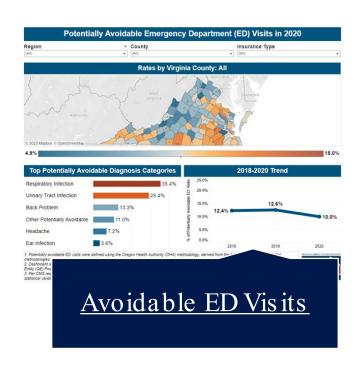

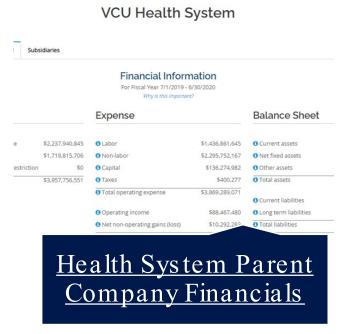

VHI Publication Examples

(links included)

Self reporting was historically our primary focus, now a major piece of a broader mission

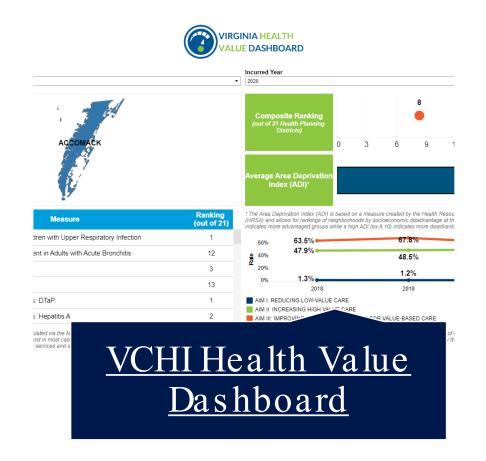

Supporting Others

(links included)

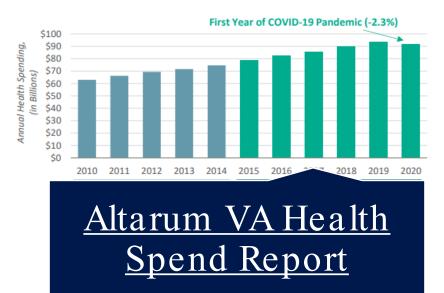

VHI supports getting important data out to the community, a lot of times through other sources

IA'S HEALTH CARE SECTOR ECONOMIC TRENDS IN 2020

erall Virginia Health Sector Spending

e 1: Virginia Annual Health Care Spending, in Billions

Collecting Data A Tangible Example:

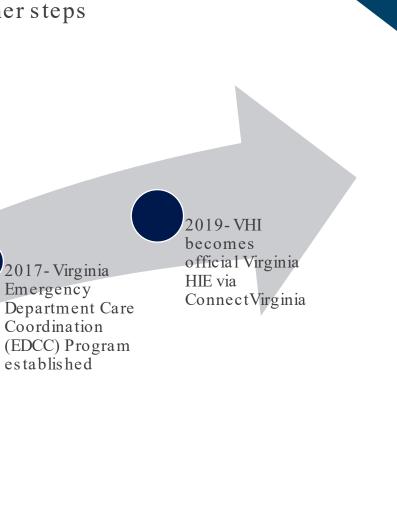

This visit will generate data for several data systems that VHI administers for the Commonwealth of VA

How VHI has Evolved

A few major highlights. There have been many other steps along the way built on a strong foundation

2013 - Virginia All-Payer Claims Database created

Emergency

Coordination

established

Patient Level Data System

1993- VHI founded,

established

How VHI Improved VA Healthcare over the past year

- ✓ The EDCC reduced super utilization of the ED by 20-35%+. The program also launched functionality to facilitate patient transitions to MAT facilities to improve care coordination around SUD
- ✓ The APCD is supporting Smarter Care Virginia (program led by VCHI), which aims to reduce healthcare costs and increase quality by eliminating potentially unnecessary, low value care
- ✓ The HIE was used to report 99%+ of relevant vaccines and labs administered to the Department of Health and provided a free way for Virginia's to create their own Advanced Directive

Current Connectivity- Snapshot

What is on the Horizon:

Expand Connectivity-

• Get Psych hospitals on the EDCC, expand CSB access

Modernize-

- Enhance EDCC usage tracking (SMART on FHIR)
- VHI reports and website
- Public Health Reporting Pathway-greater security, Master Person Index (MPI) laying foundation for broader vision

Broaden-

• Begin plan to transition to next phase of EDCC/HIE development into Health Data Utility (HDU) vision consistent with strategic planning process

Consider VHI When:

- You or your constituents need access to free healthcare information
- New forms of healthcare data need to be collected or exchanged in the Commonwealth
- Transparency and reporting are needed around new healthcare topics

Thank You.
