

The Impact of Technology on Children's Health

July 17, 2024

Purpose of the presentation

Members requested an informational presentation on the impact of technology on children's physical, social, and mental health

Agenda

Impact of Technology on Children's Health

Presented by Dr. Koeun Choi

Social Media and Children: State Legislative Landscape

Presented by Heather Morton and Flora Fouladi

Children and Technology in Virginia

Presented by Emily Atkinson

The Impacts of Technology on Children's Health

VIRGINIA JOINT COMMISSION MEETING

July 17, 2024, 10am
General Assembly Building,
House Committee Room C (206)

Koeun Choi
Virginia Tech
koeun@vt.edu

Outline

- **Children's Screen Time Usage Statistics**
- **Effects of Screen Media Use Children's Physical, Social, and Mental Health**
 - **The Benefits of Screen Media Use**
 - **The Risks of Screen Media Use**
 - **The Benefits and Risks of Social Media on Children**
- **The Role of Parents in Technology Effects on Children**
- The Importance of Taking a Holistic Approach to Technology Effects on Children
- **Q & A**

Children's Screen Time Usage Statistics

Category	Infants and Toddlers (0-2 years)	Preschoolers (3-5 years)	School-Age Children (6-12 years)	Adolescents (13-18 years)
Average Daily Screen Time (non-school related)	49 minutes (under 2)	2 hours 30 minutes (2-4 years) 3 hours (5-8 years)	5 hours 33 minutes (8-12 years)	7 hours and 22 minutes
Ownership	48% having their own device (0-8 years; 2020)		42.6% having their own smartphone (8-12 years; 2021)	95% having their own smartphone (2023)
Activity Breakdown	- TV/Video: 45 min	- TV/Video : 2 hr - Gaming: 15 min (2-4 years), 40 min (5-8 years)	- TV/Video: 2 hr 40 min - Gaming: 1 hr 27 min - Social Media: 18 min	- TV/Video: 3 hr 16 min - Gaming: 1 hr 46 min - Social Media: 1 hr 27 min

The Benefits of Screen Media on Children's Physical, Social, and Mental Health

Age-Appropriate and Educational Content, Active, Interactive, and Moderated Use

Category	Infants and Toddlers (0-2 years)	Preschoolers (3-5 years)	School-Age Children (6-12 years)	Adolescents (13-18 years)
Physical Health	<ul style="list-style-type: none"> Interactive content can engage fine motor skills 	<ul style="list-style-type: none"> Interactive content promotes physical activity 	<ul style="list-style-type: none"> Interactive games enhance physical activity 	<ul style="list-style-type: none"> Access to health information, support network for healthy behaviors
Social Health	<ul style="list-style-type: none"> Live video-chatting with responsive adults facilitate social connections with distant relatives. 	<ul style="list-style-type: none"> Educational/prosocial content enhances social skills development 	<ul style="list-style-type: none"> Educational content fosters social skills 	<ul style="list-style-type: none"> Social media fosters connections
Mental Health	<ul style="list-style-type: none"> Toddlers can learn new information from touchscreens and video-chatting, especially when these media forms involve responsive interactions. 	<ul style="list-style-type: none"> Educational content supports cognitive, language, and emotional development 	<ul style="list-style-type: none"> Educational content enhances cognitive skills and emotional regulation 	<ul style="list-style-type: none"> Positive content offers mental health support, learning

The Risks of Screen Time on Children's Physical, Social, and Mental Health

Age-Inappropriate and Non-Educational Content, Excessive and Unmonitored Use

Category	Infants and Toddlers (0-2 years)	Preschoolers (3-5 years)	School-Age Children (6-12 years) & Adolescents (13-18 years)
Physical Health	<ul style="list-style-type: none"> • Less physical activity due to screen time • Shorter night-time sleep 	<ul style="list-style-type: none"> • Sedentary behavior linked to increased obesity • Shorter night-time sleep 	<ul style="list-style-type: none"> • Sedentary behavior linked to increased obesity • Screen exposure before bed disrupts sleep quality • Linked to earlier initiation of alcohol, tobacco use, and sexual behavior
Social Health	<ul style="list-style-type: none"> • Less face-to-face interaction • Associated with social emotional delays 	<ul style="list-style-type: none"> • Reduced opportunities for social play • Associated with decreased social skills 	<ul style="list-style-type: none"> • Decreased in-person social interactions • Excessive screen time leads to feelings of loneliness • Increased exposure to cyberbullying
Mental Health	<ul style="list-style-type: none"> • An earlier age of media use predicts poor executive functioning • Limited caregiver interaction affects emotional regulation 	<ul style="list-style-type: none"> • Excessive media use is associated with cognitive and language development delays. • High cumulative hours and non-educational content predict poor executive functioning. • Violent content relates to behavioral symptoms. 	<ul style="list-style-type: none"> • Media multitasking using entertainment media negatively impacts learning and academic achievement. • Overuse of online media and video games can lead to problematic Internet use and Internet gaming disorder. • High screen time (especially social media) linked to higher rates of anxiety and depression.

The Benefits and Risks of Social Media on Children

Adolescents (13-18 years)

Aspect	Positive Effects	Negative Effects
Physical Health	<ul style="list-style-type: none">• Seeking health information and engaging in community to promote healthy behaviors• Body positivity content	<ul style="list-style-type: none">• Disruption of sleep• Negative body image
Social Health	<ul style="list-style-type: none">• Fosters connections and self-expression	<ul style="list-style-type: none">• Increased exposure to cyberbullying, sexting, online solicitation
Mental Health	<ul style="list-style-type: none">• Enhances creativity and learning through shared content	<ul style="list-style-type: none">• Exposure to harmful content• Increased anxiety and depression

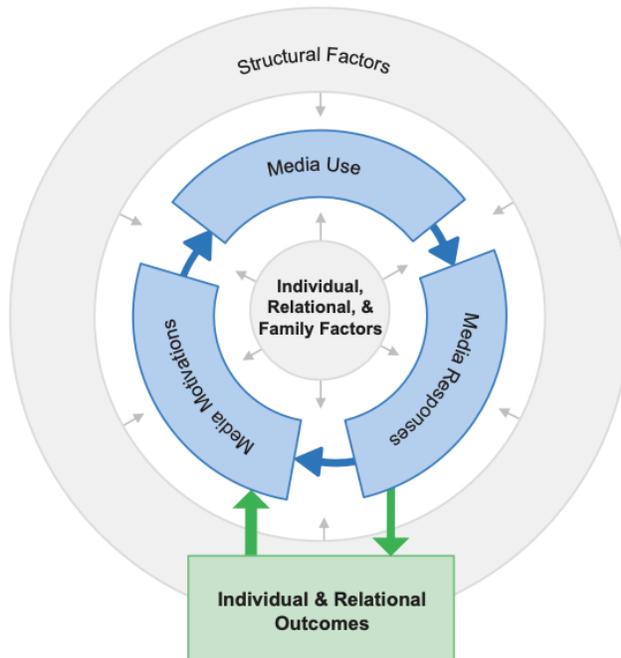

- Roughly 84% of teens (13-18 years) in the US use social media (2021).
- Also, 38% of tweens (8-12 years) in the US have used social media (2021).

The Role of Parents in Technology Effects

Category	Infants and Toddlers (0-2 years)	Preschoolers (3-5 years)	School-Age Children (6-12 years)	Adolescents (13-18 years)
Setting Limits	<ul style="list-style-type: none"> Avoid screen time except video chatting 	<ul style="list-style-type: none"> 1 hour/day high-quality content Screen-free times/zones 	<ul style="list-style-type: none"> Balance screen time with activities Involve in media plan 	<ul style="list-style-type: none"> Maintain/adapt media plan Set screen time boundaries (before bed)
Monitoring and Supervising	<ul style="list-style-type: none"> Ensure screen time is appropriate 	<ul style="list-style-type: none"> Supervise and use parental controls 	<ul style="list-style-type: none"> Parental controls Supervise online activities, educate on safety 	<ul style="list-style-type: none"> Open communication Educate on digital citizenship and safety
Active Mediation and Co-Viewing	<ul style="list-style-type: none"> Co-view to help understand content 	<ul style="list-style-type: none"> Co-view, discuss, relate content to daily life 	<ul style="list-style-type: none"> Co-view, discuss critical thinking, reality vs. fiction 	<ul style="list-style-type: none"> Discuss media use, mental health impacts, critical thinking
Promoting Quality Content	<ul style="list-style-type: none"> Choose high-quality programs/apps 	<ul style="list-style-type: none"> Choose educational programs 	<ul style="list-style-type: none"> Promote high-quality educational content 	<ul style="list-style-type: none"> Encourage positive, educational media use
Encouraging Offline Activities	<ul style="list-style-type: none"> Prioritize face-to-face interactions and play 	<ul style="list-style-type: none"> Promote physical play, reading, and hands-on activities 	<ul style="list-style-type: none"> Diverse activities, sports, hobbies 	<ul style="list-style-type: none"> Participation in sports, clubs, family engagements
Modeling Healthy Behavior	<ul style="list-style-type: none"> Limit personal screen time during family interactions Demonstrate balanced media habits Reduce background media use 			

The Importance of Taking a Holistic Approach to Technology Effects on Children

Dynamic, Relational, Ecological Approach to Media Effects Research (DREAMER) Framework

Individual & Contextual Factors

Individual, relational, & family factors that moderate media dynamics and the associations between them (e.g., child temperament, parent executive function, attachment style, coparenting, presence of siblings)

Structural factors that moderate media dynamics and associations between them (e.g., access to child care, psychosocial stressors, COVID-19 lockdowns)

Media Dynamics at Varied Timescales

Media motivations for children and parents (e.g., to calm, escape from stress, share positive content, relax together)

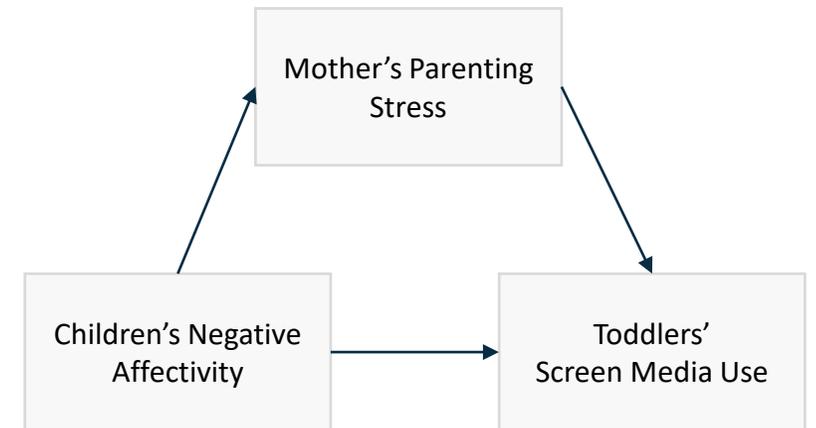

Media use by children and parents, including amount, content, design, and context (e.g., joint media engagement, technoference)

Media responses for children and parents, including cognitive, affective, behavioral, and relational aspects (e.g., cognitive overload, connectedness, behavioral dysregulation when media use ends)

Longer-Term Outcomes

Individual and relational outcomes resulting from cumulative media dynamics over time and may have transactional effects on media dynamics (e.g., children's social competence, self-regulation, language skills; parents' self-efficacy, burnout, marital satisfaction; parent-child interaction quality)

Children and Technology in Virginia

Analyst: Emily Atkinson

Virginia legislation has focused on online safety and protections for children

- 2022 Session
 - **HB 1026** – *Internet Safety Advisory Council; established, sunset date, report*
 - **HB 1215** – *Public middle schools; physical education to include personal safety training*
- 2023 Session
 - **HB 1575** – *Internet Safety Advisory Council; powers and duties*
 - **SB 1515** – *Harmful materials; civil liability for publishing or distributing to minors on the Internet*
- 2024 Session
 - **SB 361** – *Consumer Data Protection Act; protections for children*

Two state agencies report initiatives on children's technology use

Agency	No Initiatives	Implementing Initiatives	Plans for Initiatives
Virginia Department of Education		✓	✓
Virginia Foundation for Healthy Youth		✓	
Virginia Department of Medicaid Assistance Services	✓		
Virginia Department of Health	✓		
Virginia Department of Behavioral Health and Developmental Services	✓		
Virginia Department of Social Services	✓		
Office of Children's Services	✓		

Virginia Foundation for Healthy Youth grantees implement strategies aimed to reduce children's screen time

- The “Promising Practices to Reduce and Prevent Childhood Obesity Framework” suggests grantees:
 - Implement policies that reduce sedentary screen time in preschool and after-school programs
 - Provide alternative forms of activity that are age appropriate for children ages 0-18 that promote physical activity and/or creative skills development
- Six VFHY grantees have implemented various screen time reduction strategies consistent with the obesity framework, including:
 - Limiting screentime to no more than 15% of daily operations
 - Implementing a Screen Free Week

VFHY=Virginia Foundation for Healthy Youth

Virginia BOE regulates use of screens and electronic media in licensed family day homes

Regulations provide that:

- Screens and electronic media must be available no more than two hours per day
- Electronic media offered must be produced for children or are suitable for children
- Other activities must be available to children during television or video viewing

BOE=Board of Education

VDOE plans to implement several initiatives on children's technology use

- Future computer science standards and internet safety policies will include information around proper media use and screen time
- Future resources and materials for both teachers and parents will address proper screen time and social media use
- Future initiative for cell phone free education in Virginia's K-12 public schools, consistent with Executive Order 33

VDOE=Virginia Department of Education

In Summary

- There are both benefits and risks to children's technology use
- It is important to take a holistic approach to supporting families in developing healthy technology habits for children
- Social media legislation was enacted in 13 states in 2023 and 21 states in 2024
- Virginia has passed legislation related to technology and children, but there is no standardized, statewide approach which has been implemented yet
